POT LID HOLDER

PATENT

GLOBAL PATENTS IN OVER 60 COUNTRIES/REGIONS

Featuring company-exclusive design & utility patents secured domestically and internationally this is our proprietary product.

- Multiple use
- Scalding resistance
- Hygienic use
- Non-slip
- Easy storage
- Heat resistance

EASY TO USE

NON-SLIP DESIGN

Designed to prevent burns, this product securely holds hot pot lids. Simply attach the lid handle, flip it onto the base, and you can safely grip it again when needed.

POT LID HAND CLAMP SUPPORT

INCLINED RAMP HYGIENE

WARNING: Attempting to lift heavy lids one-handed risks severe burns! Hot liquids may spill through openings or cause dangerous drops.

The lid maintains a slight incline even when placed on the ground. This angled design hygienically prevents condensed steam from dripping onto the floor.

USE AS A POTTING GLOVE

NON-SLIP ROUND ROLLER

Even in the state of being placed on the floor, the lid of the pot tilts slightly. In order to keep, the water vapor sealed on the lid of the pot will not fall to the floor, very hygienic.

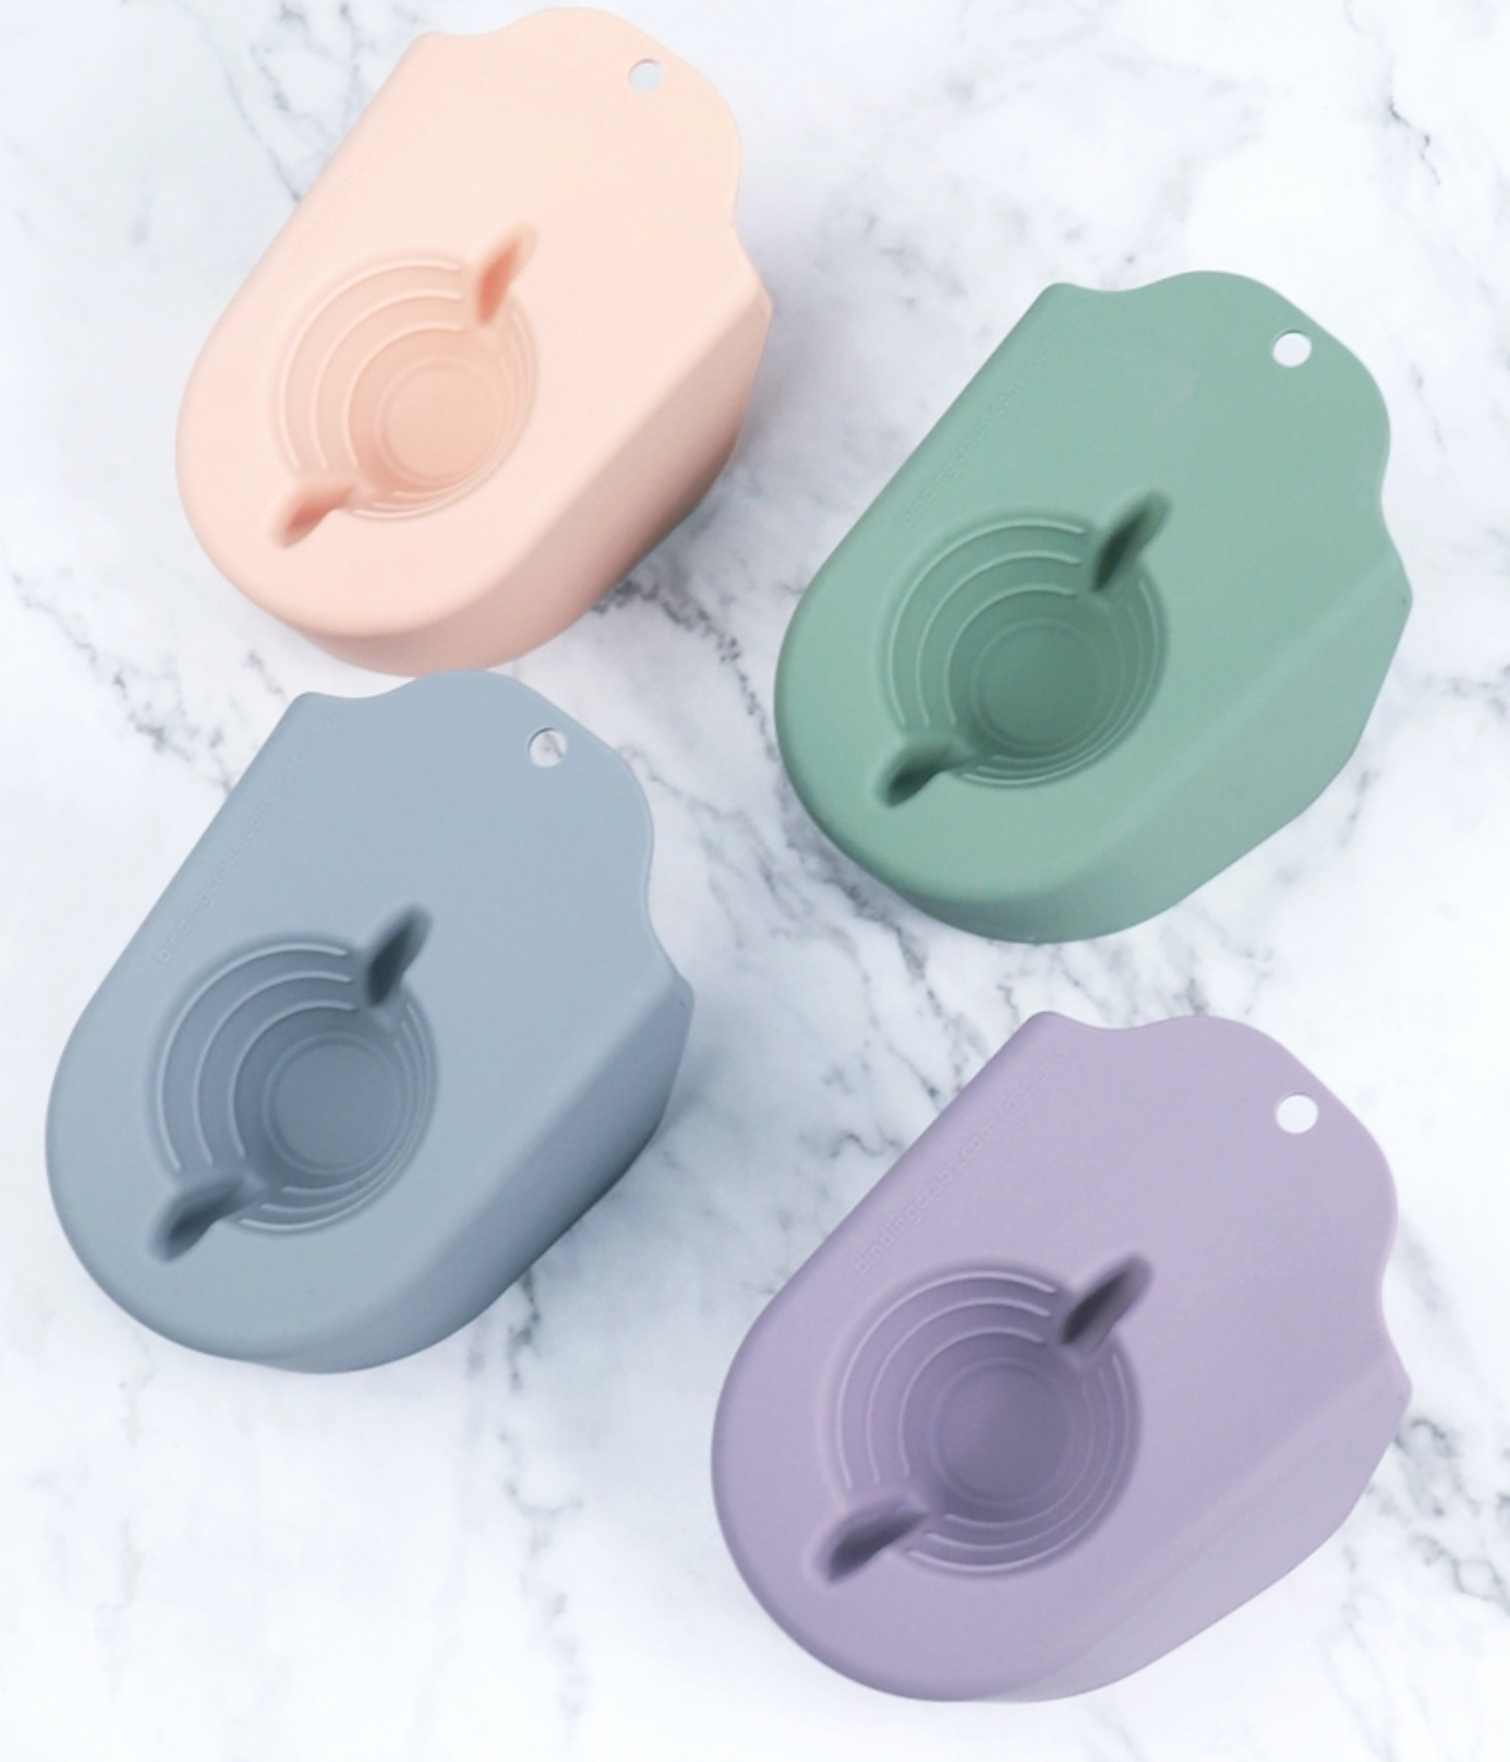
CONCAVE LINE TO WIDEN ENTRANCE

The entrance is enlarged due to the concave line on the handle part. The handle of the cauldron lid can be easily grasped even if there is no change in size.

EASY STORAGE

There are holes that can be hung on hooks for easy storage.

FOUR COLOR OPTIONS



FAQ COMMON QUESTIONS

Q Can the large and heavy pot lid be well supported?

A Yes, there is silicone thickness at the base part so it's not too tight.It can be fixed and supported. It is also good for using cast iron pots.

Q What size handle can be used for the pot lid?

A It has a free size function that can handle pots and lids ofvarious sizes from small to large.

Q ls there any risk of slipping and falling when grabbing hot pot lids?

A There is a rough stone inside that prevents slipping.

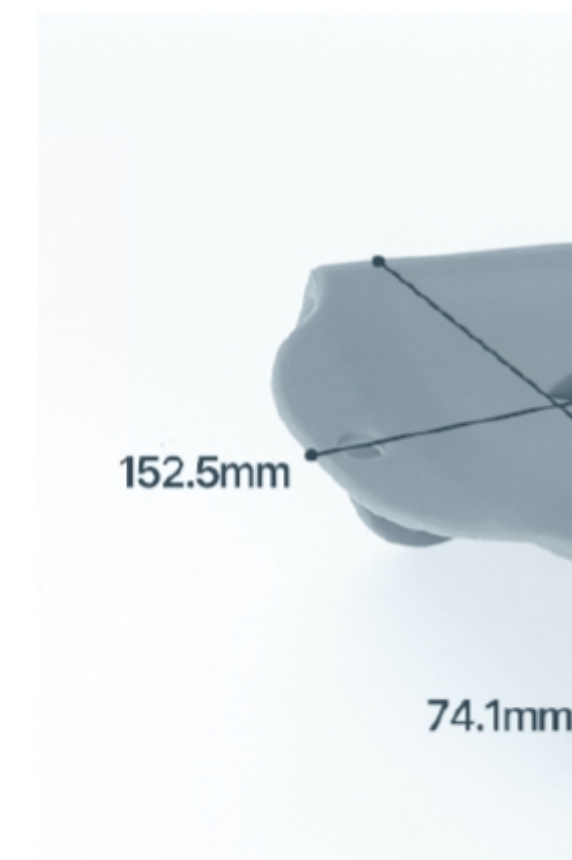
Q How hot can it get?

A The thermal conductivity is low and the heat resistance is strong up to 250°C.However, please avoid direct contact with fire sources.

Q ls it not inconvenient when you grab the large pot handle because it is round?

A With wrinkes, you can fold any shape and make it easy to handle.

PRODUCT INFORMATION



Name：pot lid holder

Material：silicone

Product size：152.5mm*103.2mm*741mm

Temperature range：-40°C~250°C

Color：green

* The size ofthe product may vary by up to 1-2mm depending on the measurement method
